PROTECTING BIODIVERSITY

PREVENTING INVASIVE WEEDS

September 23 - 26, 2024

Ensuring recent fuel reduction work yields long-term benefits, re-sprouting invasive plants will be carefully treated with herbicide. If left unmanaged, these invasive weeds will continue to grow and spread.

All treatments are occurring off-trail and will be conducted by trained staff. Staff will precisely place a small amount of herbicide by hand onto the trunk or stem of a plant.
